AgilePM Foundation

Rafał Kot

PHP Developer

I have worked as a software developer for 10 years, including 5 years of full-time positions. Throughout my career I have usually been either the only developer in the team or the most experienced one, which required me to solve development problems and make decisions without assistance. Although it taught me independent thinking, I am also eager to do team work and share my knowledge. I keep my professional development continuous and I am currently working on such techniques as TDD, DDD, CI/CD.

• Professional experience

- 2016-04 - 2018-05
MBE group Sp. z o.o.
PHP Developer
Tasks:
 - Organisation of development team workflow.
 - Analysis, design and implementation of new ATS system's and job boards' functions.
 - Code reviews, supporting junior developers.
 - Technology selection, server administration.
 - Pre-employment interviews with other developers.
 - Cooperation with subcontracting software developers.**Achievements:**

I have designed the majority of backend for the new version of the website KarierawatFinansach.pl, I have also prepared API for mobile apps. I have adapted an ATS AppManager to operate in accordance with the SaaS model. I have arranged the team's work (from task analysis to deployment).
